I am a Technical Support Engineer with a unique set of skills encompassing APIs, databases, networking, programming languages, development tools, and a commitment to providing excellent customer service. By combining my broad technical knowledge with my advanced soft skills and attention to detail from my previous career in Hotel Management, I am able to consistently deliver innovative, efficient, and polished results.

SKILLS:

- Programming Languages: JavaScript, Bash, Python, EJS, HTML, CSS.
- Databases: MySQL, Elasticsearch, MongoDB, PostgreSQL.
- Frameworks/Libraries: React, Node.js, Express, Django, jQuery, Mongoose.
- Tools: Postman, Salesforce, Jira, MySQLWorkbench, Confluence, Git, Heroku, Invision, Trello, Photoshop.

RELEVANT EXPERIENCE:

Technical Support Engineer | Akana | Perforce Software | Minneapolis, MN | June 2023 - Present

Supported advanced topics from customers and internal projects for the Akana Support Team. Maintained and updated Support Test Lab Virtual Machines. Implemented database maintenance tasks, including development and administration of custom scripts to execute via cron jobs that automated routine volatile data cleanup. Reproduced and tested intricate customer use cases. Authored knowledge base articles and videos to further overall team knowledge. Crafted custom syntax highlighting to improve review of Java application logs.

Technical Support Analyst | Akana | Perforce Software | Minneapolis, MN | July 2022 - June 2023

Gained practical and working knowledge of the Akana API Platform software. Routinely collaborated with members of the Support, Engineering, and Professional Services teams to deliver efficient and excellent customer service on a wide range of issues, questions, and requests reported by customers. Logged and assisted with Enhancement and Documentation update requests. Promoted to Technical Support Engineer after 10 months in this role.

Software Engineering Immersive | General Assembly | Remote | November 2021 – March 2022

Successfully completed 500+ hours of expert led instruction and applied computer science concepts including the industry's most in demand technologies. Learned both Frontend and Backend languages and technologies including JavaScript, React, Python, Django, Node, Express, HTML, and CSS.

PERSONAL PROJECTS:

- **Disc Golf Course Explorer:** [\[GitHub Repo\]](#) [\[Deployed Link\]](#) - Built with Express, MongoDB, Node.js, JavaScript, EJS, Bootstrap CSS. Built an Express backend with CRUD functionality and EJS templates that show detailed information and photos of disc golf courses in a visually pleasing format.
- **Random Jeopardy Clues:** [\[GitHub Repo\]](#) [\[Deployed Link\]](#) - Built with JavaScript, jQuery, HTML, CSS. Website that uses the JService API to display randomly selected clues and answers from Jeopardy.

- **Photo Wall:** [\[GitHub Repo\]](#) [\[Deployed Link\]](#) - Built with Python, Django, AWS S3, Bootstrap CSS. A full stack app that lets users create their own account and upload their photos to a linked AWS S3 Bucket to create their own beautiful 'wall' of photos.

EARLIER CAREER HISTORY:

Front Office Supervisor | Springhill Suites & TownePlace Suites by Marriott | Eden Prairie, MN | 2016 – 2020

- Delivered overall leadership of the Front Office team, including training over 20 new hires, scheduling, skills coaching, PMS user administration, and managing all hotel technology purchases.
- Promoted from Guest Service Representative to Front Office Supervisor, based on superior customer service, experienced leadership skills, and mastery of hotel Property Management Systems.

EDUCATION:

General Assembly | Software Engineering Immersive | Remote | 2021 - 2022

Bachelor of Science, Hospitality Administration | Boston University | Boston, MA | 2004-2008
